Part 2h. Eligibility to Complete SAQ C-VT

Merchant certifies eligibility to complete this Self-Assessment Questionnaire because, for this payment channel:				
The only payment processing is via a virtual payment terminal accessed by an Internet-connected web browser;				
The virtual payment terminal solution is provided and hosted by a PCI DSS validated third-party service provider;				
The PCI DSS-compliant virtual payment terminal solution is only accessed via a computing device that is isolated in a single location and is not connected to other locations or systems (this can be achieved via a firewall or network segmentation to isolate the merchant system(s) accessing the virtual payment terminal from other merchant systems);				
The computing device does not have software installed that causes account data to be stored (for example, there is no software for batch processing or store-and-forward);				
The computing device does not have any attached hardware devices that are used to capture or store account data (for example, there are no card readers attached);				
The merchant does not otherwise receive, transmit, or store account data electronically through any channels (for example, via an internal network or the Internet);				
Any account data the merchant might retain is on paper (for example, printed reports or receipts), and these documents are not received electronically.
